I am an editor-turned-coder with over 4 years of experience working with developers from a client's perspective. Even before I started coding, I enjoyed tackling systemic problems on my editorial team to optimize workflow and am excited to be able to take my abilities to the next level as a developer.

## PROJECT EXPERIENCE

### Payment App — Payment Automation

- Developed ASP.NET Core MVC web application in C# that expedites payroll for small businesses by allowing admin to pull data from .csv files and customize payment calculation parameters
- Used ASP.NET Core Identity for user authentication and roles
- Created responsive layout with Bootstrap

## WORK EXPERIENCE

### Senior Content Editor, Rakuten Viki, Seoul, August 2015 – Present\*

- Spearheaded creation of feature content system and new, efficient editorial workflow for Soompi, the publishing arm of global over-the-top streaming service Rakuten Viki
- Managed team of 15+ writers around the world for timely production of 14+ feature content items weekly, delivered to a combined audience of over 40 million.
- Analyzed trends and performance to inform content curation and strategy decisions, aiding the team in increasing monthly page views over 600% and unique users over 300% (2014–2019)
- \*Working remotely since June 2018, as a freelance editor since June 2019

### Editor, Crunchyroll, Seoul, October 2014 – August 2015

- Created style guide and established brand persona and voice for Soompi
- Hired and trained new writers
- Evaluated news items for brand compatibility
- Edited and produced high-traffic content, driving 29% increase in editorial output in 49% increase in monthly page views
